I AM CHAIR

DESIGN & INCEPTION

I AM Chair designer: **Justus Kolberg**

Justus said the biggest challenge when designing the look of the chair was making sure all the technology was cleverly hidden and integrated while the style and elegance of the chair stood out.

One of the main elements he focused on was the backrest, making sure it was flexible and moved well. After that was in place, he implemented a sliding seat pan that moves through the frame of the back; preventing an uncomfortable gap when adjusted to its furthest setting.

Key aims for I AM:

- elegance
- comfort
- user-friendly
- business-like
- versatile

ADJUSTMENTS & SUPPORT

Highly Adjustable

The I AM office chair adjusts easily and in many different ways. This is what makes this office chair suitable for 98% of all people. While seated, the adjustment knobs are easily reached and set to your own preference. With a push or flick of a button, you will adjust the various options to suit your posture.

Further Support

I AM offers a number of clever options in addition to the standard adjustment layout. A cushion can be added to the lumbar support, for example, providing extra support for your back. And for those who require more counterpressure, we offer an inflatable lumbar support.

Height adjustment of 40 - 55 cm

Seat depth adjustment of 38 - 48 cm

Lumbar support adjustment of 11 - 21 cm above the seat

Dynamic synchronous mechanism with forward tilt adjustment

ADAPTABLE FEATURES

Autofit Synchro Mechanism

You can adapt the I AM chair to your preferred setting via the synchronous mechanism. You can also have the Autofit synchronous mechanism adjust the chair for you, creating an optimal balance and perfect seating position.

3D Armrests

I AM offers a diverse and responsive armrests to support different activities. The 3D armrests provide plenty of adjustability and 36 to 51cm of space in between the two armrests, making it highly suitable for long work hours.

3D ARMRESTS:

Height Adjustment

Width Adjustment

Depth Adjustment

SUSTAINABILITY & RESPONSIBILITY

Responsibility

Techo stands for high-quality products and we remain responsible for those products throughout their lifecycles, while reducing waste production where possible.

When your I AM chair has reached the end of its lifecycle, we will repurpose it or refurbish it to brand-new, as part of our commitment to creating a greener and more resourceful world.

Circular Service

Techo offers the following optional services in order for you to make optimal use of your I AM task chair.

- I AM is installed by skilled Techo fitters, allowing you to get to work right away.
- Preventive maintenance will ensure that your chair is always at its highest utility.
- Has your chair become redundant? You can return it and we will give it a new lease of life where it will be recycled and refurbished.

ACCREDITATION
